Release history (3.x–6.x)

Source file: `doc/eng-us/release-overview` Last changed 2026-11-04
https://doc.exponential.earth/learninminutes/exphelp/viewer/release-overview

252 releases from 2002-11-01 to 2026-06-07 with their release names, dates and revisions. The older records come from the original SVN repository. Addresses on servers that are no longer online are kept as historical text.

The records below follow 4.2. They were added in 2026 from sources only: the git tags of this repository, doc/changelogs/, the GitHub releases of se7enxweb/exponential and the releases and tags of the archived upstream repository github.com/ezsystems/ezpublish-legacy. Each record names its source; a date that no source gives is "unknown". 5.90 is the alias of the 2017.08 and later legacy releases (doc/eng-us/bc/5.90/README.md).
