Singleton / instance()

A class that hands out one shared instance per key, mostly through a static instance() method (often cached in $GLOBALS). 77 instances in Exponential.

Source file: `doc/eng-us/standards/patterns/singleton.md` Last changed 2026-11-04

> This page is generated from the source code by `php bin/php/exppatterncatalogue.php --write`. Do not edit it by hand: change the code or the generator, then run the command again. How the patterns are recognized: the pattern catalogue.

A class that hands out one shared instance per key, mostly through a static instance() method (often cached in $GLOBALS).

Group	Creation
Instances	77
Recognized by	Has a static instance() or getInstance() method.
Extension point	Call Class::instance(); many of them take the settings file or database as the key.
